APPLICANT : MATSUSHITA ELECTRIC IND CO LTD;

INVENTOR : ISHIDA MAKOTO;

INT.CL. : H04N 5/45

TITLE : TWO-PATTERN TELEVISION  
RECEIVER

ABSTRACT : PURPOSE: To print the information of a slave pattern as a hard copy by converting a digital signal read from a memory for displaying the slave pattern from a parallel data into a serial data and applying the data to an external printer.

CONSTITUTION: A parallel digital signal for displaying the slave pattern read from the memory 5 is processed by an input signal processing section 8, stored temporarily in a memory section 10 via a data control section 9, read out of the section 10 and converted into a serial signal by a parallel/serial data converting section 11 and outputted to a printer 14 connected externally via a data transmission section 12 and a printer control section 13. Thus, the slave pattern is printed by the printer 14 as a hard copy.
